International Safety Products

International Safety Products Ltd. is the World's largest manufacturer of marine inflatable lifejackets, and a leading manufacturer/supplier of survival equipment.

We use the very latest in textile technology and pursue an innovative design philosophy, ensuring production of safety equipment capable of performing to the highest standard in the most extreme of conditions.

Intrepid Submarine Surface Abandonment Clothing - ISSAC

Purpose

An emergency, surface abandonment suit for submariners. Designed as a single use garment to ensure personnel can evacuate stricken vessels in an emergency on the surface and aid survival until rescue.

Description

ISSAC is of universal sizing and will fit all personnel from the smallest recruit to the largest. Easy to don, the suit features a full length waterproof zip to facilitate entry. A full face seal on the neoprene hood helps ensure that the survivor remains warm and dry. Five fingered gloves allow the wearer the ability to undertake routine tasks requiring dexterity. Manufactured from 'tough' PU coated nylon.

The integral 160N orally inflated lifejacket, complete with spray hood, is designed for ease of donning in a cramped space. The lifejacket is manufactured using high visibility neon yellow fabric and utilises a long established ISP, CE approved bladder. Packed in a multi-laminate, air extracted, foil bag for long life protection and stowed in a chest/waist worn valise. The whole ensemble is then sealed in a polythene bag for on-board stowage. Donning instructions conveniently printed on valise.

Technical Data

Survival Suit	
Suit	PU coated nylon
Hood	3mm Neoprene
Sizes	Universal-One size fits all
Lifejacket	
Buoyancy	160N
Inflation	Oral
