

International Safety Products

URGENT NEWS RELEASE

International Safety Products, the World's leading manufacturer of inflatable lifejackets and survival equipment, will be showing three, NEW and NEWLY APPROVED lifejackets for the first time in the UK on the Seawater stand no. 136 at the Seawork exhibition (15-17 June 2010) at Canary Islands Fruit Terminal (Berth 103-104) Herbert Walker Avenue, Western Dock, ABP Port of Southampton.

These exciting new lifejackets are:

Challenger Flexi-Wing 150, Challenger Interlock 275 Series III, and the Challenger Aqua Junior 100

The Challenger Flexi-Wing 150 lifejacket features an all new bladder design to ensure superior performance in the water compared to any other lifejacket in its class. Featuring two chambers which automatically inflate independently via separate inflation systems, this 150 Newton lifejacket has a SOLAS light, buddy line and retroreflective tape fitted as standard. A wide range of covers are available including red nylon, orange wipe clean PVC and fire-retardant Panotex.

An ISO 12401 approved Deck Harness version is also available as an option and the jacket can be fitted with either stainless steel or plastic buckles. Waist belt extenders as required under the new legislation are also available.

The Challenger Interlock 275 Series III is the latest generation of the highly successful Challenger Interlock 275 lifejacket. Featuring two chambers, each of which is independently and automatically inflated by separate inflation systems, the new Challenger Interlock 275 Series III is a 275 newton jacket, available with all of the same options as offered with the Challenger Flexi-Wing 150. The Challenger Interlock 275 Series III is also available in a full Offshore specification in a hermetically sealed bag for extended service where allowed by Flag State or other Authority.

Crotch straps and spray hoods are additional options for both the Challenger Flexi-Wing 150 and the Challenger Interlock 275 Series III.

Both the Challenger Flexi-Wing 150 and the Challenger Interlock 275 Series III Lifejackets feature Wave Barrier Technology ISP's patented, interlocking lobe bladder design which self-rights the wearer in under 5 seconds and provides an effective Wave Barrier preventing water from being channelled into the airways. The tailored neck design gives vital support to head and neck, even if the subject is unconscious

Making it's debut for the very first time will be the Challenger Aqua Junior 100, a child's Lifejacket, also part of ISP's SOLAS 2010 range. Specifically designed to meet the demands of providing a comfortable and compact lifejacket that conforms to the latest regulations and is less cumbersome than a foam lifejacket. The Aqua Junior 100 fits children in the weight range of 15kg to 43kg and is fitted with crotch straps for added security of fit. Available in a wide variety of cover options, features include 100 Newtons buoyancy and Twin Chamber Security. **More importantly, the Aqua Junior 100 complies with the latest amendments to SOLAS Chapter III 2010.**

Seawater Marine Services Ltd., are a UK distributor for ISP's range of Challenger lifejackets and Intrepid immersion suits.
