

Alcares LED Lifejacket light

Model Jack A-Aik

Water Sensor

On/Off Switch

Lifejacket Clip

Details

The LED Alcares light is only 16mm in depth and is supplied with a clip so that it can easily be fitted into any lifejacket. The light has rounded edges to prevent damage to the lifejacket bladder. The LED light automatically activates when exposed to water and has an intensity of greater than the 0.75cd standard; it also has a manual on/off switch.
