International Safety Products

International Safety Products Ltd. is the World's largest manufacturer of marine inflatable lifejackets, and a leading manufacturer/supplier of survival equipment.

We use the very latest in textile technology and pursue an innovative design philosophy, ensuring production of safety equipment capable of performing to the highest standard in the most extreme of conditions.

MRLJ (Multi Role Life Jackets)

Purpose

This jacket ideally suits Airbourne Operations and yet easily fulfils other multi role uses in all geographical areas of extreme and adverse climates. The low profile design is compatible with most harness designs and is rigged high to clear chest-worn reserve packs. It can be easily discarded whilst on the move via the side release buckles.

Description

The life jacket comprises an inflatable stole with high visibility reflective patches, extremely compact outer zipped valise, adjustable webbing harness and a gas inflation system. The inflation is activated manually and backed up by a top up/deflate oral tube facility. This jacket is made to extremely high defence standards in synthetic durable materials and is probably the most compact military life jacket available.
